

Beech Class enjoyed their Forest Sessions on site due to COVID. It gave us lots of different opportunities like the Muddy Kitchen which became a Victorian one. We planted seeds and plants that grew in Victorian Gardens and looked at the language of flowers.

We even discovered that our new tree donated by Sorrel's Dad was created in 1872 - a true Victorian tree!

Whittling, Slack Line, Pond dipping, Tree Climbing, and creating Dens. We also investigated fragrant leaves.

We enjoyed Happa Zome where you collect leaves and flowers fold cloth in half and bash with a stone or mallet. The results were quite spectacular and reminded us of William Morris designs.

On our final week we lit the fire and whittled our own sticks to cook marshmallows

One week we explored just outside the school and played 'Crossing the Swamp'. We thought about Victorian Explorers, made observational drawings, pressed flowers, checked how many species of flowers could be found within a hoop and used a spotters guide to identify them.
